

The diagram illustrates the relationships between seven nodes representing different attitudes towards meat consumption. The nodes are color-coded: blue (T0, T1), green (T19, T24), and orange (T10, T2). The edges are color-coded: orange (T0-T1, T0-T19, T0-T2, T1-T19, T1-T2, T1-T24, T10-T2, T10-T24, T2-T24) and purple (T0-T24, T1-T24, T19-T10, T19-T24, T24-T10, T24-T2).

Nodes and their descriptions:

- T0 (Blue):** Increasing meat prices limit beef consumption (T0)
- T1 (Blue):** Meat is central in my family culture (T1)
- T19 (Green):** I eat meat with most dinners (T19)
- T10 (Orange):** I want to consume enough protein (T10)
- T2 (Orange):** My wife suggests eating less meat
- T24 (Green):** I love the taste of meat (T24)
- Unlabeled (Grey):** I enjoy preparing different kinds of meat

Relationships (Edges):

- Orange Edges:** T0-T1, T0-T19, T0-T2, T1-T19, T1-T2, T1-T24, T10-T2, T10-T24, T2-T24
- Purple Edges:** T0-T24, T1-T24, T19-T10, T19-T24, T24-T10, T24-T2

The diagram illustrates a network of nine nodes representing different factors influencing meat consumption. The nodes are connected by lines, with some connections highlighted in orange. The nodes and their connections are as follows:

- Nodes:**
 - Meat is a big part of my culture (T1) (Blue)
 - Eating meat feels more natural to me (Blue)
 - Limited meat availability affects my choices (T0) (Blue)
 - My family consumes lots of meat (T1) (Blue)
 - I prefer protein from whole foods (T10) (Orange)
 - High meat prices reduce what I buy (T0) (Blue)
 - I love to prepare and cook meat (Orange)
 - I enjoy eating beef, pork, chicken, seafood (Orange)
 - I want to consume a lot of protein (T10) (Orange)
 - We share meat-centered meals at gatherings (T9) (Orange)
- Connections:**
 - Meat is a big part of my culture (T1) is connected to all other nodes.
 - Eating meat feels more natural to me is connected to all other nodes.
 - Limited meat availability affects my choices (T0) is connected to all other nodes.
 - My family consumes lots of meat (T1) is connected to all other nodes.
 - I prefer protein from whole foods (T10) is connected to all other nodes.
 - High meat prices reduce what I buy (T0) is connected to all other nodes.
 - I love to prepare and cook meat is connected to all other nodes.
 - I enjoy eating beef, pork, chicken, seafood is connected to all other nodes.
 - I want to consume a lot of protein (T10) is connected to all other nodes.
 - We share meat-centered meals at gatherings (T9) is connected to all other nodes.

The diagram illustrates a graph structure with four nodes: T1 (light blue), T0 (dark blue), T9 (orange), and T10 (orange). Node T1 has a self-loop. Thick purple edges connect T1 to T0 and T1 to T9. Thick orange edges connect T0 to T9 and T0 to T10.
