

The diagram illustrates the relationships between various statements related to meat consumption and elimination. The nodes are represented by colored circles, and the edges are represented by colored lines.

**Nodes:**

- Orange nodes:**
  - I am in favor of animal rights (T5)
  - I eat chicken a few times a week
  - I feel moral unease about eating animals (T5)
  - I want to eliminate meat from my diet (T7)
- Grey nodes:**
  - I never eat pork
  - I eat beef occasionally
  - Health reasons prevent total meat elimination
  - I share meat-eating habits with my partner
- Blue nodes:**
  - I avoid eating intelligent animals (T5)
  - Family reasons prevent total meat elimination (T1)

**Edges:**

- Orange edges:**
  - I am in favor of animal rights (T5) to I want to eliminate meat from my diet (T7)
  - I eat chicken a few times a week to I want to eliminate meat from my diet (T7)
  - I feel moral unease about eating animals (T5) to I want to eliminate meat from my diet (T7)
  - I eat beef occasionally to I want to eliminate meat from my diet (T7)
  - I feel moral unease about eating animals (T5) to I avoid eating intelligent animals (T5)
  - I want to eliminate meat from my diet (T7) to I avoid eating intelligent animals (T5)
  - I want to eliminate meat from my diet (T7) to Family reasons prevent total meat elimination (T1)
  - I want to eliminate meat from my diet (T7) to I share meat-eating habits with my partner
- Purple edges:**
  - I am in favor of animal rights (T5) to I avoid eating intelligent animals (T5)
  - I eat chicken a few times a week to I avoid eating intelligent animals (T5)
  - I feel moral unease about eating animals (T5) to I avoid eating intelligent animals (T5)
  - I eat beef occasionally to I avoid eating intelligent animals (T5)
  - I avoid eating intelligent animals (T5) to Family reasons prevent total meat elimination (T1)
  - Family reasons prevent total meat elimination (T1) to I share meat-eating habits with my partner
  - Health reasons prevent total meat elimination to I share meat-eating habits with my partner
- Green edge:**
  - Health reasons prevent total meat elimination to I share meat-eating habits with my partner

```
graph TD; T1((T1)) ---|orange| T7((T7)); T5((T5)) ---|purple| T7; T5 --|purple| T5;
```

My partner has dietary restrictions (T7)

I advocate for animal rights (T5)

I eat beef about once a week (T15)

I find meal preparation efficiency important (T12)

I buy humanely certified eggs

I believe meat is necessary for health (T11)

I eat chicken several times a week

I am morally conflicted about eating meat (T0)

I try to minimize animal suffering (T5)

A graph with nodes T0, T5, T11, T12, T15, and T7. T0 is blue, T5 is orange, T11 and T12 are green, T15 is red, and T7 is orange. Edges connect T0-T5 (thick green), T5-T11 (thin orange), T11-T12 (thin purple), and T12-T7 (thin purple).
