

Figure 1 is a path diagram illustrating the relationships between variables at two time points, T0 and T1. The variables are represented by nodes, and the paths are indicated by arrows. The nodes are colored based on their time point: blue for T0, orange for T1, and green for T3. The paths are colored based on their significance: orange for significant paths and purple for non-significant paths.

The variables and their time points are:

- I do not like limiting what I eat (T0) - Blue node
- I sometimes feel self-conscious eating all meats (T-1) - Blue node
- I believe meat gives me energy (T0) - Blue node
- I see meat as a good protein source (T3) - Green node
- I eat meat during dinner meals (T0) - Blue node
- I sometimes prefer dishes without meat (T0) - Blue node
- Social contacts watch their weight (T1) - Orange node
- Social contacts choose less fatty meats (T1) - Orange node

The significant paths (orange arrows) are:

- I do not like limiting what I eat (T0) to I sometimes feel self-conscious eating all meats (T-1)
- I do not like limiting what I eat (T0) to Social contacts watch their weight (T1)
- I do not like limiting what I eat (T0) to Social contacts choose less fatty meats (T1)
- I eat meat during dinner meals (T0) to Social contacts choose less fatty meats (T1)

The non-significant paths (purple arrows) are:

- I sometimes feel self-conscious eating all meats (T-1) to Social contacts watch their weight (T1)
- I sometimes feel self-conscious eating all meats (T-1) to Social contacts choose less fatty meats (T1)
- I believe meat gives me energy (T0) to I see meat as a good protein source (T3)
- I see meat as a good protein source (T3) to I eat meat during dinner meals (T0)
- I sometimes prefer dishes without meat (T0) to I eat meat during dinner meals (T0)

A graph with three nodes: T-1 (blue), T1 (orange), and T0 (green). T-1 is connected to T0 by an orange edge, and T0 is connected to T1 by an orange edge. T-1 is also connected to T1 by a purple edge.

The diagram illustrates the relationships between five statements related to meat consumption. The nodes and their connections are as follows:

- Nodes:**
 - T0 (Green):** I eat meat when it is available
 - T1 (Orange):** My family eats similar amounts of meat as me
 - T2 (Orange):** I sometimes prefer foods other than meat
 - T3 (Green):** I value meat for protein and nutrients
 - T11 (Green):** I don't seek out meat
- Edges:**
 - Purple Edges:** T0 is connected to T1, T2, and T11.
 - Orange Edges:** T1 is connected to T2. T2 is connected to T3.

A graph with five nodes: T0 (blue), T1 (orange), T2 (orange), T3 (green), and T11 (green). Edges connect T0 to T1, T0 to T2, T0 to T3, T1 to T2, T2 to T3, and T2 to T11. The edges are colored purple, orange, and green.

The diagram illustrates the relationships between 10 statements related to meat consumption. The nodes are represented by colored circles and connected by lines. The nodes are:

- Meat keeps me feeling full longer (T0) (Blue)
- I eat meat regularly (T0) (Blue)
- Meat feels familiar and satisfying (T-1) (Blue)
- Most recipes I know use meat (T0) (Blue)
- I grew up eating meat (T-1) (Blue)
- I want to feel healthier (T6) (Green)
- I find meat convenient (T0) (Blue)
- Meals and gatherings usually include meat (T1) (Orange)
- People around me eat meat regularly (T1) (Orange)
- I want a more balanced diet (T6) (Green)

The connections between the nodes are as follows:

- Meat keeps me feeling full longer (T0) is connected to I eat meat regularly (T0) by a purple line.
- Meat feels familiar and satisfying (T-1) is connected to I eat meat regularly (T0) by a purple line.
- Meat feels familiar and satisfying (T-1) is connected to I grew up eating meat (T-1) by a purple line.
- I grew up eating meat (T-1) is connected to I eat meat regularly (T0) by a purple line.
- I grew up eating meat (T-1) is connected to I find meat convenient (T0) by a purple line.
- I find meat convenient (T0) is connected to I eat meat regularly (T0) by a purple line.
- I find meat convenient (T0) is connected to People around me eat meat regularly (T1) by a purple line.
- Most recipes I know use meat (T0) is connected to I eat meat regularly (T0) by a purple line.
- Most recipes I know use meat (T0) is connected to I want to feel healthier (T6) by a purple line.
- Most recipes I know use meat (T0) is connected to I want a more balanced diet (T6) by a purple line.
- I want to feel healthier (T6) is connected to Meals and gatherings usually include meat (T1) by a purple line.
- Meals and gatherings usually include meat (T1) is connected to I eat meat regularly (T0) by a purple line.
- Meals and gatherings usually include meat (T1) is connected to People around me eat meat regularly (T1) by a purple line.
- People around me eat meat regularly (T1) is connected to I want a more balanced diet (T6) by a purple line.
- I want a more balanced diet (T6) is connected to I eat meat regularly (T0) by an orange line.

```

```

A network diagram illustrating the relationships between various factors influencing meat consumption. The nodes are represented by colored circles with text labels and time points in parentheses. The nodes are interconnected by numerous purple lines, representing complex relationships between these factors.

- Nodes:**
 - I am not pressured by others' habits (T-1) (Blue circle)
 - I seek balance in my meals (T6) (Green circle)
 - I am flexible with my food choices (T0) (Blue circle)
 - Social contacts have different eating habits (T1) (Orange circle)
 - Meat is easy to prepare (T0) (Blue circle)
 - I eat meat in moderation (T-1) (Blue circle)
 - I sometimes eat plant-based meals (T14) (Green circle)
 - I choose familiar meats like chicken or fish (T2) (Orange circle)
 - I want variety in my meals (T6) (Green circle)
 - Some social contacts eat meat for protein (T1) (Orange circle)
- Connections:** The nodes are highly interconnected, with many lines connecting different factors, suggesting a complex web of influences on meat consumption.

The diagram illustrates the relationships between 12 statements related to plant-based eating. The nodes are clustered into five groups, each represented by a different color and labeled with a time point (T0, T7, T8, T9, T1, T10, T11, T12, T13). The statements and their corresponding time points are:

- Red (T12):** I am concerned about climate change
- Green (T8):** I care about free health care, animal welfare
- Blue (T0, T1, T10, T11):**
 - (T0) I plan weekly menus with my husband
 - (T1) I eat mostly vegetarian dinners
 - (T10) I eat mostly plant-based meals
 - (T11) I eat mostly plant-based meals
- Orange (T7, T13):**
 - (T7) My daughter favors vegetarian dishes
 - (T13) Protein focus among young adults
- Purple (T9):** I eat mostly plant-based meals

The edges represent relationships between these statements, showing how different factors (like health care, animal welfare, family influence, and social norms) are interconnected in the context of plant-based eating.

Meat eating is the cultural tradition (T11)

I cook vegetarian meals at home (T7)

I eat small portions of meat while traveling (T0)

I am concerned about animal welfare (T8)

I am concerned about climate change (T12)

Requires meat (T13)

Social conventions (T14)

believe plant-based is healthier (T14)

I believe in vegetarianism (T14)

A network graph with 8 nodes labeled T1, T3, T7, T8, T11, T12, T14, and T0. The nodes are colored: T1 (orange), T3 (orange), T7 (orange), T8 (green), T11 (green), T12 (red), T14 (pink), and T0 (blue). The graph shows a dense set of connections between nodes, with a prominent orange edge between T1 and T11.

The diagram illustrates the relationships between 10 statements related to ethical meat consumption. The nodes are represented by colored circles and connected by lines of different colors. The statements and their connections are as follows:

- Green Nodes (5):**
 - I watch animal welfare documentaries (T8)
 - My family values animal welfare (T8)
 - I am an animal welfare advocate (T8)
 - I seek ethically sourced meat (T9)
 - I reduce red meat consumption (T4)
- Orange Nodes (2):**
 - My family enjoys eating diverse foods (T1)
 - I love the taste of meat (T9)
- Red Nodes (3):**
 - I avoid eating octopus (T2)
 - I have health concerns (T10)
 - I love the taste of meat (T9)

Connections:

- Purple Lines:**
 - I watch animal welfare documentaries (T8) to I am an animal welfare advocate (T8)
 - I watch animal welfare documentaries (T8) to I seek ethically sourced meat (T9)
 - I watch animal welfare documentaries (T8) to I reduce red meat consumption (T4)
 - My family values animal welfare (T8) to I seek ethically sourced meat (T9)
 - My family values animal welfare (T8) to I reduce red meat consumption (T4)
 - I am an animal welfare advocate (T8) to I seek ethically sourced meat (T9)
 - I am an animal welfare advocate (T8) to I reduce red meat consumption (T4)
 - I seek ethically sourced meat (T9) to I avoid eating octopus (T2)
 - I seek ethically sourced meat (T9) to I reduce red meat consumption (T4)
 - I reduce red meat consumption (T4) to I avoid eating octopus (T2)
 - I reduce red meat consumption (T4) to I have health concerns (T10)
- Orange Lines:**
 - I love the taste of meat (T9) to My family enjoys eating diverse foods (T1)
 - I love the taste of meat (T9) to I reduce red meat consumption (T4)
 - My family enjoys eating diverse foods (T1) to I reduce red meat consumption (T4)

The diagram illustrates the relationships between 10 statements (T0-T10) related to ethical meat consumption. The nodes are categorized by color: red (T9), green (T4, T8), blue (T0, T1, T10), and orange (T2). The edges are colored purple or orange, representing different types of relationships.

Nodes and Statements:

- T9 (Red):** I love the taste of meat (T9)
- T4 (Green):** I limit red meat consumption (T4)
- T2 (Orange):** I mainly eat chicken and fish (T2)
- T8 (Green):** I am concerned about animal welfare (T8)
- T8 (Green):** My family is concerned about animal welfare (T8)
- T10 (Blue):** I am concerned about health (T10)
- T0 (Blue):** Meat is unaffordable from ethical vendors (T0)
- T1 (Blue):** Restaurants are a treat for me (T-1)
- T0 (Blue):** I buy grass-fed, free-range meat (T0)
- T0 (Blue):** Ethical options are limited at restaurants (T0)

Relationships (Edges):

- Purple Edges (Primary Relationships):**
 - T9 to T4
 - T9 to T2
 - T9 to T8 (I am concerned about animal welfare)
 - T9 to T8 (My family is concerned about animal welfare)
 - T9 to T10
 - T4 to T2
 - T4 to T8 (I am concerned about animal welfare)
 - T4 to T8 (My family is concerned about animal welfare)
 - T4 to T10
 - T2 to T8 (I am concerned about animal welfare)
 - T2 to T8 (My family is concerned about animal welfare)
 - T2 to T1
 - T8 (I am concerned about animal welfare) to T10
 - T8 (My family is concerned about animal welfare) to T10
 - T10 to T0 (Meat is unaffordable from ethical vendors)
 - T10 to T0 (I buy grass-fed, free-range meat)
 - T10 to T0 (Ethical options are limited at restaurants)
 - T0 (Meat is unaffordable from ethical vendors) to T0 (I buy grass-fed, free-range meat)
 - T0 (Meat is unaffordable from ethical vendors) to T0 (Ethical options are limited at restaurants)
 - T0 (I buy grass-fed, free-range meat) to T0 (Ethical options are limited at restaurants)
 - T0 (Ethical options are limited at restaurants) to T1
- Orange Edges (Secondary Relationships):**
 - T9 to T8 (I am concerned about animal welfare)
 - T9 to T8 (My family is concerned about animal welfare)
 - T4 to T2
 - T2 to T8 (I am concerned about animal welfare)
 - T2 to T8 (My family is concerned about animal welfare)
 - T2 to T1
 - T8 (I am concerned about animal welfare) to T10
 - T8 (My family is concerned about animal welfare) to T10
 - T10 to T0 (Meat is unaffordable from ethical vendors)
 - T10 to T0 (I buy grass-fed, free-range meat)
 - T10 to T0 (Ethical options are limited at restaurants)
 - T0 (Meat is unaffordable from ethical vendors) to T0 (I buy grass-fed, free-range meat)
 - T0 (Meat is unaffordable from ethical vendors) to T0 (Ethical options are limited at restaurants)
 - T0 (I buy grass-fed, free-range meat) to T0 (Ethical options are limited at restaurants)
 - T0 (Ethical options are limited at restaurants) to T1

The diagram illustrates a network of nodes and edges. The nodes are labeled T0, T1, T2, T4, T8, T9, T10, and T-1. The nodes are colored: T9, T4, and T8 are green; T2 and T10 are orange; T0 and T-1 are blue. The edges are colored: purple, orange, or green. A thick green path connects T10, T0, and T8. A thick green loop is at T0. A thick orange path connects T9, T4, and T8. A thick purple path connects T0, T1, and T2. A thick purple loop is at T8.

Wave 2 — LLM (stances)

Wave 2 — LLM (topics)

A graph diagram illustrating a network structure. The nodes are labeled T1, T-1, T2, and T0. T1 is an orange node, T-1 is a blue node, T2 is an orange node, and T0 is a blue node. The edges are colored and have varying thicknesses: T1 is connected to T-1, T2, and T0 by thick purple lines; T2 is connected to T0 by a thick orange line; and T-1 is connected to T0 by a thin blue line.

The diagram illustrates a network of factors influencing meat consumption. The nodes and their connections are as follows:

- Nodes:**
 - Blue nodes:** "I eat meat with every meal (T0)", "I was raised eating meat regularly (T-1)", "Eating meat feels like a habit (T-1)".
 - Orange nodes:** "Family eats meat in a similar way (T1)", "Tradition motivates my social circle (T1)".
 - Green nodes:** "Protein is what I'm used to (T3)", "I thought briefly about animal welfare (T8)".
- Connections (Purple lines):**
 - "I eat meat with every meal (T0)" is connected to "Family eats meat in a similar way (T1)", "I was raised eating meat regularly (T-1)", "Protein is what I'm used to (T3)", "I thought briefly about animal welfare (T8)", "Eating meat feels like a habit (T-1)", and "Tradition motivates my social circle (T1)".
 - "Family eats meat in a similar way (T1)" is connected to "I eat meat with every meal (T0)", "I was raised eating meat regularly (T-1)", "Protein is what I'm used to (T3)", "I thought briefly about animal welfare (T8)", "Eating meat feels like a habit (T-1)", and "Tradition motivates my social circle (T1)".
 - "I was raised eating meat regularly (T-1)" is connected to "I eat meat with every meal (T0)", "Family eats meat in a similar way (T1)", "Protein is what I'm used to (T3)", "I thought briefly about animal welfare (T8)", "Eating meat feels like a habit (T-1)", and "Tradition motivates my social circle (T1)".
 - "Protein is what I'm used to (T3)" is connected to "I eat meat with every meal (T0)", "Family eats meat in a similar way (T1)", "I was raised eating meat regularly (T-1)", "I thought briefly about animal welfare (T8)", "Eating meat feels like a habit (T-1)", and "Tradition motivates my social circle (T1)".
 - "I thought briefly about animal welfare (T8)" is connected to "I eat meat with every meal (T0)", "Family eats meat in a similar way (T1)", "I was raised eating meat regularly (T-1)", "Protein is what I'm used to (T3)", "Eating meat feels like a habit (T-1)", and "Tradition motivates my social circle (T1)".
 - "Eating meat feels like a habit (T-1)" is connected to "I eat meat with every meal (T0)", "Family eats meat in a similar way (T1)", "I was raised eating meat regularly (T-1)", "Protein is what I'm used to (T3)", "I thought briefly about animal welfare (T8)", and "Tradition motivates my social circle (T1)".
 - "Tradition motivates my social circle (T1)" is connected to "I eat meat with every meal (T0)", "Family eats meat in a similar way (T1)", "I was raised eating meat regularly (T-1)", "Protein is what I'm used to (T3)", "I thought briefly about animal welfare (T8)", and "Eating meat feels like a habit (T-1)".

A graph with five nodes: T0 (light blue), T2 (orange), T6 (green), T9 (red), and T10 (green). Edges connect T0 to T2, T0 to T6, T0 to T9, T2 to T9, and T6 to T9. The edge between T0 and T9 is highlighted in thick green.

I enjoy the texture of fried meat (T9)

I prefer beef and pork (T2)

I eat fried chicken and fried fish (T2)

My family shared traditional meat meals (T1)

Meat meals symbolize family and community (T1)

I have financial limitations (T-1)

I have thought about veganism or vegetarianism (T7)

A network diagram with five nodes: T7 (green), T-1 (blue), T1 (orange), T2 (orange), and T9 (red). The nodes are arranged vertically. T7 is at the bottom, connected to T-1, T1, and T2 by orange lines. T-1 is connected to T1 by a purple line. T1 is connected to T2 by a purple line. T2 is connected to T9 by a purple line. Self-loops are present on T1 and T2.

The diagram illustrates a network of factors influencing vegetarianism. The nodes and their connections are as follows:

- Nodes:**
 - I used to eat a lot of meat (T0)** (Blue circle)
 - I saw documentaries about animal ethics (T8)** (Green circle)
 - I want to avoid killing animals (T8)** (Green circle)
 - My parents are vegetarian (T7)** (Orange circle)
 - I enjoy being a vegetarian (T7)** (Orange circle)
 - I am vegetarian (T7)** (Orange circle)
- Connections:**
 - Thick Orange Lines:**
 - I used to eat a lot of meat (T0) to I want to avoid killing animals (T8)
 - I used to eat a lot of meat (T0) to I am vegetarian (T7)
 - I want to avoid killing animals (T8) to I am vegetarian (T7)
 - Thin Purple Lines:**
 - I used to eat a lot of meat (T0) to I saw documentaries about animal ethics (T8)
 - I used to eat a lot of meat (T0) to I enjoy being a vegetarian (T7)
 - I saw documentaries about animal ethics (T8) to I want to avoid killing animals (T8)
 - I saw documentaries about animal ethics (T8) to I am vegetarian (T7)
 - I want to avoid killing animals (T8) to I am vegetarian (T7)
 - My parents are vegetarian (T7) to I am vegetarian (T7)
 - I enjoy being a vegetarian (T7) to I am vegetarian (T7)

My wife makes veggie dishes sometimes (T14)

My wife cannot tolerate beef (T0)

The cost of living affects my choices (T0)

I love the taste of meat (T9)

I am aware of cruelty in the meat industry (T0)

I struggle with contradictions of eating meat (T-1)

A graph diagram with five nodes: T-1 (blue), T0 (light blue), T5 (green), T9 (red), and T14 (pink). The nodes are connected by edges of various colors (orange, purple, green). T5 is connected to T-1, T0, and T9. T0 is connected to T-1, T5, T9, and T14. T9 is connected to T-1, T0, and T5. T14 is connected to T0 and T5. There is a self-loop on T0.

The diagram illustrates a network of factors influencing meat consumption, organized into four time-based categories represented by node colors: blue (T-1), orange (T1), green (T7), and red (T9). The nodes and their connections are as follows:

- Blue Nodes (T-1):**
 - Childhood habits influence my meat eating (T-1)
 - I grew up eating meat regularly (T-1)
- Orange Nodes (T1):**
 - I consider cost when choosing foods (T0)
 - My social circle mostly eats meat (T1)
 - I choose meat for convenience (T0)
 - I prefer the taste of meat (T9)
- Green Nodes (T7):**
 - Health issues caused me to consider reducing meat (T0)
 - My wife's dietary needs (limit meat at home) (T0)
 - My wife eats a partial vegetarian diet (T7)
- Red Node (T9):**
 - I eat more chicken and turkey at home (T2)

Connections (Edges):

- Purple Edges (T-1 to T1):**
 - Childhood habits influence my meat eating (T-1) to I consider cost when choosing foods (T0)
 - Childhood habits influence my meat eating (T-1) to My social circle mostly eats meat (T1)
 - Childhood habits influence my meat eating (T-1) to I choose meat for convenience (T0)
 - Childhood habits influence my meat eating (T-1) to I prefer the taste of meat (T9)
 - I grew up eating meat regularly (T-1) to I consider cost when choosing foods (T0)
 - I grew up eating meat regularly (T-1) to My social circle mostly eats meat (T1)
 - I grew up eating meat regularly (T-1) to I choose meat for convenience (T0)
 - I grew up eating meat regularly (T-1) to I prefer the taste of meat (T9)
- Orange Edges (T1 to T7):**
 - I consider cost when choosing foods (T0) to Health issues caused me to consider reducing meat (T0)
 - I consider cost when choosing foods (T0) to My wife's dietary needs (limit meat at home) (T0)
 - I consider cost when choosing foods (T0) to My wife eats a partial vegetarian diet (T7)
 - My social circle mostly eats meat (T1) to Health issues caused me to consider reducing meat (T0)
 - My social circle mostly eats meat (T1) to My wife's dietary needs (limit meat at home) (T0)
 - My social circle mostly eats meat (T1) to My wife eats a partial vegetarian diet (T7)
 - I choose meat for convenience (T0) to Health issues caused me to consider reducing meat (T0)
 - I choose meat for convenience (T0) to My wife's dietary needs (limit meat at home) (T0)
 - I choose meat for convenience (T0) to My wife eats a partial vegetarian diet (T7)
 - I prefer the taste of meat (T9) to Health issues caused me to consider reducing meat (T0)
 - I prefer the taste of meat (T9) to My wife's dietary needs (limit meat at home) (T0)
 - I prefer the taste of meat (T9) to My wife eats a partial vegetarian diet (T7)
 - I prefer the taste of meat (T9) to I eat more chicken and turkey at home (T2)

A graph with 7 nodes and 10 edges. The nodes are labeled T-1, T0, T1, T2, T7, T9. The nodes are colored: T-1 (blue), T0 (blue), T1 (orange), T2 (green), T7 (green), T9 (red). The edges are colored: green, orange, or purple. The edges are: (T-1, T0) green, (T-1, T1) green, (T-1, T9) purple, (T0, T1) green, (T0, T7) green, (T1, T9) green, (T1, T7) orange, (T2, T7) orange, (T2, T9) orange, (T9, T7) orange. There is a self-loop on T-1 (purple).

A graph with four nodes: T0 (blue), T1 (light blue), T13 (green), and T5 (orange). Edges connect T0 to T1, T13, and T5; T1 to T13; and T13 to T5. The edge between T0 and T5 is highlighted in orange.

The diagram illustrates a network of seven statements related to meat consumption, with nodes and edges representing relationships between them. The nodes are colored based on their category: green for 'Meat consumption', orange for 'Meat preference', and blue for 'Meat consumption'. The edges are colored purple for general relationships and orange for a specific relationship.

Nodes and their categories:

- Green Node (Meat consumption):** I love eating meat (T13)
- Orange Node (Meat preference):** I prefer pork and chicken over beef (T2)
- Blue Node (Meat consumption):** I buy meat at the store (T0)
- Blue Node (Meat consumption):** Meat price influences my choices (T0)
- Blue Node (Meat consumption):** I rarely discuss meat-eating habits socially (T1)
- Blue Node (Meat consumption):** I have not considered reducing meat (T0)
- Blue Node (Meat consumption):** My family prefers beef more than I do (T1)

Edges and their categories:

- Purple Edges (General relationships):**
 - I love eating meat (T13) to I prefer pork and chicken over beef (T2)
 - I love eating meat (T13) to I buy meat at the store (T0)
 - I love eating meat (T13) to Meat price influences my choices (T0)
 - I love eating meat (T13) to I rarely discuss meat-eating habits socially (T1)
 - I love eating meat (T13) to I have not considered reducing meat (T0)
 - I love eating meat (T13) to My family prefers beef more than I do (T1)
 - I prefer pork and chicken over beef (T2) to I buy meat at the store (T0)
 - I prefer pork and chicken over beef (T2) to Meat price influences my choices (T0)
 - I prefer pork and chicken over beef (T2) to I rarely discuss meat-eating habits socially (T1)
 - I prefer pork and chicken over beef (T2) to I have not considered reducing meat (T0)
 - I prefer pork and chicken over beef (T2) to My family prefers beef more than I do (T1)
 - I buy meat at the store (T0) to Meat price influences my choices (T0)
 - Meat price influences my choices (T0) to I rarely discuss meat-eating habits socially (T1)
 - Meat price influences my choices (T0) to I have not considered reducing meat (T0)
 - Meat price influences my choices (T0) to My family prefers beef more than I do (T1)
 - I rarely discuss meat-eating habits socially (T1) to I have not considered reducing meat (T0)
 - I rarely discuss meat-eating habits socially (T1) to My family prefers beef more than I do (T1)
 - I have not considered reducing meat (T0) to My family prefers beef more than I do (T1)
- Orange Edge (Specific relationship):**
 - I prefer pork and chicken over beef (T2) to My family prefers beef more than I do (T1)

A graph with four nodes: T1 (green), T0 (blue), T2 (orange), and T3 (light blue). Edges connect T1-T0, T0-T2, T2-T3, and T3-T0. Self-loops are present on T0 and T2. The edge T2-T3 is highlighted in green.

The diagram illustrates a network of beliefs and behaviors related to meat consumption. The nodes are:

- Meat is believed essential for fitness in my group (T0)
- I want protein for energy and focus (T3)
- I am concerned about environmental impact (T12)
- I lack confidence cooking vegetarian meals (T7)
- I eat meat most days (T5)
- I prefer convenient food options (T0)
- My family sees meat as a meal staple (T1)
- My friends eat meat for convenience (T1)
- I like the taste of meat (T9)
- I eat meat most days (T5)

The nodes are connected by orange and purple lines, representing different types of relationships or influences.

[illegible]

A graph with five nodes: T8 (green), T7 (green), T1 (light blue), T0 (dark blue), and T5 (orange). Edges connect T8 to T7, T1, and T5; T7 to T1 and T0; T1 to T0; and T0 to T5. A thick green line highlights the path T8-T7-T0, and a thick orange line highlights the path T8-T5.

The diagram illustrates a network of reasons for eating meat, with nodes representing specific reasons and edges representing relationships between them. The nodes are:

- I include meat with meals once daily (T0)
- I intermittent fast (T5)
- I want to hit protein goals (T3)
- I feel better after eating lean meat (T0)
- Vegetarian meals are more expensive locally (T7)
- Good vegetarian options are limited in some countries (T7)
- I have ethical concerns about meat (T0)
- My child is vegetarian for ethical reasons (T7)

The connections between the nodes are as follows:

- I include meat with meals once daily (T0) is connected to I intermittent fast (T5), I want to hit protein goals (T3), I feel better after eating lean meat (T0), and I have ethical concerns about meat (T0).
- I intermittent fast (T5) is connected to I include meat with meals once daily (T0) and I want to hit protein goals (T3).
- I want to hit protein goals (T3) is connected to I include meat with meals once daily (T0), I intermittent fast (T5), and I feel better after eating lean meat (T0).
- I feel better after eating lean meat (T0) is connected to I include meat with meals once daily (T0), I want to hit protein goals (T3), and Good vegetarian options are limited in some countries (T7).
- Vegetarian meals are more expensive locally (T7) is connected to I have ethical concerns about meat (T0) and Good vegetarian options are limited in some countries (T7).
- Good vegetarian options are limited in some countries (T7) is connected to I feel better after eating lean meat (T0), Vegetarian meals are more expensive locally (T7), and My child is vegetarian for ethical reasons (T7).
- I have ethical concerns about meat (T0) is connected to Vegetarian meals are more expensive locally (T7) and My child is vegetarian for ethical reasons (T7).
- My child is vegetarian for ethical reasons (T7) is connected to Good vegetarian options are limited in some countries (T7) and I have ethical concerns about meat (T0).

Figure 1 is a network diagram illustrating relationships between six variables related to meat consumption and ethical concerns. The variables are represented by nodes, and the connections between them are represented by edges. The nodes are:

- I aim to meet protein goals (T3)
- I eat meat a few times a week (T5)
- I am morally and ethically conflicted (T0)
- Good vegetarian options are limited (T7)
- I would like to be vegetarian (T7)
- My eldest is a vegetarian (T7)

The diagram shows connections between these variables, with some connections highlighted in purple and others in orange. The purple connections are:

- I aim to meet protein goals (T3) to I eat meat a few times a week (T5)
- I am morally and ethically conflicted (T0) to I would like to be vegetarian (T7)
- My eldest is a vegetarian (T7) to I would like to be vegetarian (T7)

The orange connections are:

- I aim to meet protein goals (T3) to I am morally and ethically conflicted (T0)
- I aim to meet protein goals (T3) to Good vegetarian options are limited (T7)
- I aim to meet protein goals (T3) to I would like to be vegetarian (T7)
- I eat meat a few times a week (T5) to I am morally and ethically conflicted (T0)
- I eat meat a few times a week (T5) to Good vegetarian options are limited (T7)
- I eat meat a few times a week (T5) to I would like to be vegetarian (T7)
- I am morally and ethically conflicted (T0) to Good vegetarian options are limited (T7)
- Good vegetarian options are limited (T7) to I would like to be vegetarian (T7)

The diagram illustrates a network of 10 nodes representing factors influencing meat consumption. The nodes are connected by purple lines, and an orange path highlights a specific sequence of nodes.

Nodes and their descriptions:

- Green nodes:**
 - My social circle eats red meat regularly (T4)
 - My social circle prefers red meat (T4)
 - I eat minimal red meat (T4)
 - I prefer chicken and pork to red meat (T4)
- Orange nodes:**
 - I am happy with a plant based diet (T14)
 - I buy chicken and pork (T2)
- Blue nodes:**
 - I think food origin is important (T0)
 - I am aware of beef's carbon footprint (T0)
 - I have budget considerations (T-1)
 - I buy meat on sale (T0)

Connections and the highlighted path:

The nodes are connected by purple lines. An orange path highlights the following sequence of nodes: I am aware of beef's carbon footprint (T0) → I prefer chicken and pork to red meat (T4) → I buy chicken and pork (T2) → I am happy with a plant based diet (T14) → My social circle eats red meat regularly (T4) → My social circle prefers red meat (T4) → I eat minimal red meat (T4).

```

    T4 --- T14((T14))
    T4 --- Tm1
    Tm1 --- T0
    Tm1 --- T4
  
```

The diagram illustrates a network of factors influencing meat consumption. The nodes and their connections are as follows:

- Nodes:**
 - Blue nodes:** 'I consider cost when choosing food (T0)' (top left), 'I am mindful of portion sizes (T0)' (top right), 'I consider environmental impact of meat (T0)' (middle right), and 'I consider cost when choosing food (T0)' (bottom left).
 - Green nodes:** 'I eat meat several times a week (T5)' (top center) and 'I prefer chicken or fish to red meat (T4)' (bottom right).
 - Red nodes:** 'I often buy pork for budget reasons (T11)' (middle left) and 'Discussions with friends increase my environmental awareness (T12)' (top right).
 - Orange node:** 'I want protein in my diet (T3)' (center).
- Connections:**
 - Purple lines:** Connect 'I consider cost when choosing food (T0)' (top left) to 'I eat meat several times a week (T5)', 'I am mindful of portion sizes (T0)', 'I consider environmental impact of meat (T0)', and 'I consider cost when choosing food (T0)' (bottom left).
 - Orange line:** Connects 'I eat meat several times a week (T5)' to 'I want protein in my diet (T3)'.
 - Green line:** Connects 'I want protein in my diet (T3)' to 'I prefer chicken or fish to red meat (T4)'.
 - Red line:** Connects 'Discussions with friends increase my environmental awareness (T12)' to 'I consider environmental impact of meat (T0)'.

The diagram illustrates a network of eight statements (nodes) and their relationships (edges). The nodes are represented by colored circles with text labels. The edges are purple lines. A thick orange line connects the node 'I eat meat for iron (T3)' to the node 'I eat meat often (T0)'.

Nodes:

- I eat meat for iron (T3) (Orange circle)
- I was raised in a hunting culture (T-1) (Blue circle)
- I eat wild meats (T0) (Orange circle)
- I honor the animals sacrificed for food (T8) (Green circle)
- People around me eat meat often (T1) (Orange circle)
- I am not big on meat flavor (T9) (Red circle)
- I think about animal life (T8) (Green circle)
- I eat meat often (T0) (Blue circle)

Edges (Purple lines):

- I eat meat for iron (T3) to I was raised in a hunting culture (T-1)
- I eat meat for iron (T3) to I eat wild meats (T0)
- I eat meat for iron (T3) to I honor the animals sacrificed for food (T8)
- I eat meat for iron (T3) to I am not big on meat flavor (T9)
- I eat meat for iron (T3) to I think about animal life (T8)
- I eat meat for iron (T3) to I eat meat often (T0)
- I was raised in a hunting culture (T-1) to I eat wild meats (T0)
- I was raised in a hunting culture (T-1) to I honor the animals sacrificed for food (T8)
- I was raised in a hunting culture (T-1) to I am not big on meat flavor (T9)
- I was raised in a hunting culture (T-1) to I think about animal life (T8)
- I was raised in a hunting culture (T-1) to I eat meat often (T0)
- I eat wild meats (T0) to I honor the animals sacrificed for food (T8)
- I eat wild meats (T0) to I am not big on meat flavor (T9)
- I eat wild meats (T0) to I think about animal life (T8)
- I eat wild meats (T0) to I eat meat often (T0)
- I honor the animals sacrificed for food (T8) to I am not big on meat flavor (T9)
- I honor the animals sacrificed for food (T8) to I think about animal life (T8)
- I honor the animals sacrificed for food (T8) to I eat meat often (T0)
- I am not big on meat flavor (T9) to I think about animal life (T8)
- I am not big on meat flavor (T9) to I eat meat often (T0)
- I think about animal life (T8) to I eat meat often (T0)

Thick Orange Line:

- I eat meat for iron (T3) to I eat meat often (T0)

A network diagram illustrating connections between five nodes labeled T1, T3, T8, T9, and T10. The nodes are arranged in a pentagonal pattern. T1 (orange) is at the bottom left, T3 (orange) is at the top left, T8 (green) is at the bottom center, T9 (red) is at the bottom right, and T10 (blue) is at the top right. The connections are as follows:

- T1 is connected to T3, T8, and T9.
- T3 is connected to T1, T8, T9, and T10.
- T8 is connected to T1, T3, T9, and T10.
- T9 is connected to T1, T3, T8, and T10.
- T10 is connected to T3, T8, T9, and T1.

The edge connecting T3 and T8 is highlighted in thick green, while all other edges are thin purple lines.

The diagram illustrates the relationships between eight meat-related beliefs, represented as nodes and connected by edges. The nodes are:

- I do not enjoy eating meat (T11) (Red circle)
- I eat meat for protein (T3) (Orange circle)
- I reflect on eating animals (T8) (Green circle)
- I prefer eating sides and vegetables (T14) (Purple circle)
- I eat meat a couple times a week (T5) (Dark Green circle)
- I limit how much meat I eat (T0) (Dark Purple circle)
- I had a negative childhood experience with meat (T-1) (Blue circle)
- I eat meat for iron (T3) (Orange circle)

The edges represent relationships between these beliefs. A specific path is highlighted in orange, connecting the following nodes in sequence: I eat meat for protein (T3) → I eat meat for iron (T3) → I limit how much meat I eat (T0) → I eat meat a couple times a week (T5) → I do not enjoy eating meat (T11).
