

[illegible]

A network diagram with six nodes: T2 (blue), T8 (green), T4 (orange), T10 (red), T3 (orange), and T7 (green). The nodes are connected by edges. A thick green line connects T2 and T7. Other edges are thin purple lines connecting T2 to T8, T2 to T10, T8 to T4, T8 to T7, T4 to T10, T3 to T10, and T3 to T7. Node T10 is the central hub, connected to T2, T8, T4, T3, and T7.

The graph consists of 7 nodes labeled T1 through T7. The nodes are colored as follows: T1 is red, T2 is blue, T3 is yellow, T4 is orange, T5 is light blue, T6 is light orange, and T7 is green. The edges are colored as follows: the edge between T1 and T2 is red, the edge between T1 and T3 is blue, the edge between T1 and T4 is yellow, the edge between T1 and T5 is orange, the edge between T2 and T3 is light blue, the edge between T2 and T4 is light orange, the edge between T2 and T5 is light blue, the edge between T3 and T4 is light orange, the edge between T3 and T5 is light blue, and the edge between T4 and T5 is light orange. The graph shows a complex network of connections between these nodes.
