

[illegible]

The graph consists of six nodes: T12 (red), T4 (green), T2 (orange), T0 (light blue), T-1 (dark blue), and T1 (orange). The nodes are connected by purple lines forming a path: T2 - T4 - T0 - T-1 - T1. Node T12 is isolated. There are orange arcs above nodes T0 and T-1.

The diagram illustrates a network of factors influencing meat consumption. The nodes and their connections are as follows:

- Green nodes (top):**
 - I try to eat less red meat (T4)
 - I am influenced by gym and muscle gain culture (T3)
 - I eat meat for protein and iron (T3)
- Blue nodes (middle):**
 - Meat is easier to prepare for a group (T0)
 - I lack confidence in cooking meat well (T0)
 - Meat is expensive compared to alternatives (T0)
- Orange nodes (bottom):**
 - My family encouraged eating meat at meals (T1)
 - Exposure to animal rights documentaries (T8)
 - I prioritize animal welfare (T8)

Connections:

- Purple lines connect: (T4) to (T0) [I lack confidence...], (T4) to (T3) [I am influenced...], (T3) to (T8) [I prioritize...], (T0) [Meat is expensive...] to (T1) [My family...], and (T3) [I eat meat for protein...] to (T8) [I prioritize...].
- Orange lines connect: (T1) to (T8) and (T3) [I eat meat for protein...] to (T8) [I prioritize...].

A graph with five nodes: T0 (light blue), T1 (orange), T3 (green), T4 (green), and T8 (red). The edges are: T0-T4 (purple), T1-T8 (orange), and T3-T8 (orange). There are self-loops on T3 and T8, both represented by purple loops.
