

The diagram illustrates a network of relationships between various nodes representing meat consumption and health concerns. The nodes are connected by lines of the same color as the node they originate from.

- Blue nodes:**
 - Chicken is more sustainable and healthier (T2)
 - Meat choices depend on beef sales (T0)
- Green nodes:**
 - I am concerned about cholesterol (T10)
 - I eat chicken for heart health (T2)
- Orange nodes:**
 - Red meat is more expensive than chicken (T4)
 - I avoid red meat on weekdays (T4)
 - My wife avoids red meat (T4)
 - Red meat causes health complications for me (T4)

The connections are as follows:

- A purple line connects "Chicken is more sustainable and healthier (T2)" to "I eat chicken for heart health (T2)".
- A purple line connects "I eat chicken for heart health (T2)" to "I avoid red meat on weekdays (T4)".
- A green line connects "Red meat is more expensive than chicken (T4)" to "Meat choices depend on beef sales (T0)".
- An orange line connects "Meat choices depend on beef sales (T0)" to "I avoid red meat on weekdays (T4)".
- An orange line connects "Meat choices depend on beef sales (T0)" to "My wife avoids red meat (T4)".
- An orange line connects "Meat choices depend on beef sales (T0)" to "Red meat causes health complications for me (T4)".

```

graph LR
    T1((T1)) ---|purple| T2((T2))
    T1 ---|light purple| T4((T4))
    T4 ---|green| T0((T0))

```

The diagram illustrates the relationships between six nodes representing different factors influencing meat consumption. The nodes are: 'I have health complications (T10)' (green), 'I eat chicken and white meat (T2)' (blue), 'I eat red meat sparingly (T4)' (orange), 'I prefer the taste of chicken (T9)' (orange), 'I avoid red meat for health reasons (T14)' (orange), and 'Alternative meat choices are not the norm (T0)' (blue). Edges connect the nodes: T10 to T2, T9, and T4; T2 to T9 and T14; T9 to T14; T4 to T0; and T0 to T14.

A graph diagram illustrating a path of nodes. The nodes are labeled T9, T2, T10, T4, and T0. The edges connect the following pairs of nodes: (T9, T2), (T2, T10), (T2, T4), and (T4, T0). The nodes are colored: T9 is orange, T2 is light blue, T10 is green, T4 is orange, and T0 is blue. The edges are colored: (T9, T2) is purple, (T2, T10) is purple, (T2, T4) is purple, and (T4, T0) is orange.
