

The diagram illustrates a network of factors influencing meat consumption, with nodes representing different variables and edges representing relationships between them. The nodes are labeled as follows:

- I have reduced red meat intake over time (T4)** (Green circle)
- I frequently think about reduced health risks from meat consumption (T0)** (Blue circle)
- I am aware of meat intake (T0)** (Blue circle)
- Exposure to vegetarian recipes through social contacts (T7)** (Red circle)
- Social contacts vary in meat consumption habits (T1)** (Blue circle)
- I occasionally eat pork or red meat (T4)** (Green circle)
- I eat mostly chicken (T2)** (Orange circle)
- I eat meat for protein (T3)** (Orange circle)
- I eat meat for flavor (T13)** (Purple circle)

The edges connecting the nodes are color-coded and represent different types of relationships or influences:

- Green edges:** Connect 'I have reduced red meat intake over time (T4)' to 'I occasionally eat pork or red meat (T4)' and 'I eat meat for protein (T3)'.
- Orange edges:** Connect 'I occasionally eat pork or red meat (T4)' to 'I eat mostly chicken (T2)' and 'I eat meat for flavor (T13)'. Also connects 'I frequently think about reduced health risks from meat consumption (T0)' to 'I eat meat for protein (T3)'.
- Purple edges:** Connect 'I eat meat for flavor (T13)' to 'I occasionally eat pork or red meat (T4)' and 'I eat meat for protein (T3)'.
- Blue edges:** Connect 'I frequently think about reduced health risks from meat consumption (T0)' to 'I have reduced red meat intake over time (T4)' and 'I am aware of meat intake (T0)'. Also connects 'I am aware of meat intake (T0)' to 'I have reduced red meat intake over time (T4)'.
- Red edges:** Connect 'Exposure to vegetarian recipes through social contacts (T7)' to 'I have reduced red meat intake over time (T4)' and 'I am aware of meat intake (T0)'. Also connects 'Social contacts vary in meat consumption habits (T1)' to 'I have reduced red meat intake over time (T4)'.

A network diagram illustrating a central node T4 (green) connected to five peripheral nodes: T0 (blue), T1 (light blue), T2 (orange), T3 (yellow), and T7 (red). The connections are color-coded: purple for T0, T1, and T7; green for T2 and T3. The nodes are arranged in a fan shape around T4.

The diagram illustrates a network of relationships between five nodes, each representing a different focus or behavior related to meat consumption. The nodes are connected by purple lines, with the thickness of the lines indicating the strength of the relationship. The nodes are colored: T0 is blue, T1 is green, T4 is green, T5 is green, and T11 is red.

- I focus on reducing meat consumption (T0)** (Blue node)
- I eat less meat generally (T1)** (Green node)
- I limit my meat consumption if it leads to the cost of trying to avoid meat (T4)** (Green node)
- Healthier (T5)** (Green node)
- I try to avoid beef (T11)** (Red node)

The connections are as follows:

- T0** is connected to **T1**, **T4**, **T5**, and **T11** by thick purple lines.
- T1** is connected to **T4** by a medium purple line.
- T4** is connected to **T5** by a medium purple line.
- T5** is connected to **T11** by a medium purple line.

A diagram showing a sequence of four nodes: T0 (blue), T4 (green), T6 (green), and T11 (red), connected by a thick purple line. T0 and T4 are overlapping.
