

The diagram illustrates a network of 10 nodes, each representing a statement. The nodes are color-coded: red for T10, orange for T2, and teal for T1. The connections (edges) are as follows:

- Red nodes (T10):**
 - "I have health concerns (T10)" is connected to "I occasionally eat fried chicken (T2)" and "My family has health challenges (T10)".
 - "My family has health challenges (T10)" is connected to "I occasionally eat fried chicken (T2)".
- Orange nodes (T2):**
 - "I occasionally eat fried chicken (T2)" is connected to "I love eating meat (T2)", "I eat chicken daily (T2)", and "I prepare chicken with an air fryer (T2)".
 - "I love eating meat (T2)" is connected to "I eat chicken daily (T2)".
 - "I eat chicken daily (T2)" is connected to "I try to eat more fish (T2)", "I alternate beef and turkey weekly (T2)", and "I prepare chicken with an air fryer (T2)".
 - "I try to eat more fish (T2)" is connected to "My family has similar eating habits (T1)".
 - "I alternate beef and turkey weekly (T2)" is connected to "I prepare chicken with an air fryer (T2)".
- Teal nodes (T1):**
 - "My family has similar eating habits (T1)" is connected to "I try to eat more fish (T2)".
 - "Southern cuisine was central when growing up (T-1)" is connected to "I prepare chicken with an air fryer (T2)".

A graph with five nodes: T1 (orange), T2 (orange), T10 (pink), T13 (purple), and T-1 (blue). Edges connect T1-T13, T13-T2, T2-T10, T10-T-1, and T-1-T2. The edge between T10 and T2 is highlighted in orange.

My family eats meat frequently (T1)

I eat meat every day (T5)

I ignore advice from vegetarians and vegans (T7)

Cheap meat products are widely available (T0)

I love the taste of meat (T9)

Meat has appealing texture and seasoning (T9)

I sometimes substitute turkey for beef (T2)

I want to eat more fish (T2)

A graph diagram with nodes T0, T5, T7, T9, T1, and T2. The nodes are colored: T0 is blue, T5 and T7 are green, T9 is red, and T1 and T2 are orange. The edges are: T0-T7 (orange), T7-T5 (orange), T5-T9 (purple), and T9-T2 (purple). There are self-loops on T5, T9, and T2 (all purple).
