

The diagram illustrates a network of relationships between six nodes, each representing a different factor. The nodes are: 'I want to gain weight (T6)' (green), 'I cook meat at home (T-1)' (blue), 'I eat a high protein diet (T3)' (orange), 'I appreciate the texture of meat (T9)' (red), 'I have health motivations (T6)' (green), and 'I have price concerns (T6)' (green). The nodes are connected by lines: purple lines connect (T6) to (T-1), (T-1) to (T3), (T-1) to (T9), (T3) to (T9), (T6) to (T9), (T6) to (T3), (T6) to (T-1), (T6) to (T9), and (T6) to (T3); orange lines connect (T6) to (T3) and (T9) to (T0).

A graph with five nodes: T-1 (orange), T3 (orange), T6 (green), T0 (blue), and T9 (red). The edges are: T6-T-1, T6-T3, T6-T0 (thick), T-1-T3, T3-T0, and T0-T9. The edge between T0 and T9 is orange, while all other edges are light blue.
