

The diagram illustrates the relationships between 10 nodes representing different factors influencing meat consumption. The nodes are:

- Green nodes:**
 - My social circle eats red meat regularly (T4)
 - I prefer chicken and pork to red meat (T4)
 - My social circle prefers red meat (T4)
 - Eat minimal red meat (T4)
- Orange nodes:**
 - I buy chicken and pork (T2)
 - I am happy with a plant based diet (T14)
- Blue nodes:**
 - I think food origin is important (T0)
 - I am aware of beef's carbon footprint (T0)
 - I buy meat on sale (T0)
 - I have budget considerations (T-1)

The nodes are interconnected by lines, with a highlighted path in orange connecting the following nodes in sequence: I prefer chicken and pork to red meat (T4) → I buy chicken and pork (T2) → I am happy with a plant based diet (T14) → My social circle eats red meat regularly (T4) → My social circle prefers red meat (T4) → Eat minimal red meat (T4). Other connections include: I think food origin is important (T0) to I am aware of beef's carbon footprint (T0); I am aware of beef's carbon footprint (T0) to I buy chicken and pork (T2); I buy chicken and pork (T2) to I buy meat on sale (T0); I buy meat on sale (T0) to I have budget considerations (T-1); I have budget considerations (T-1) to I prefer chicken and pork to red meat (T4); and I am happy with a plant based diet (T14) to I have budget considerations (T-1).

```

The diagram illustrates the relationships between nine variables related to meat consumption and environmental awareness. The variables are represented by colored circles: blue (T0), green (T4, T5), red (T11), and orange (T3). The connections are as follows:

- T0 (blue):** I consider cost when choosing food (T0). It is connected to T5, T11, T3, and T4.
- T5 (green):** I eat meat several times a week (T5). It is connected to T0 and T11.
- T11 (red):** I often buy pork for budget reasons (T11). It is connected to T0, T5, and T3.
- T3 (orange):** I want protein in my diet (T3). It is connected to T0, T11, and T4.
- T4 (green):** I prefer chicken or fish to red meat (T4). It is connected to T0 and T3.
