

The diagram illustrates the relationships between various factors influencing meat consumption. The nodes and their connections are as follows:

- Nodes:**
 - Orange nodes:** "I am trying to cut down on red meat (T2)", "I have health concerns about red meat (T2)", "I eat chicken, beef, and pork (T3)", "I feel better eating less red meat (T2)".
 - Blue nodes:** "I want to choose leaner meats (T-1)", "I want to eat more plant-based foods (T-1)", "I save money buying chicken and pork (T-1)".
 - Green node:** "I am concerned about environmental impacts (T13)".
- Edges:**
 - Purple edges:** Connect "I am trying to cut down on red meat (T2)" to "I want to choose leaner meats (T-1)", "I want to eat more plant-based foods (T-1)", "I save money buying chicken and pork (T-1)", "I eat chicken, beef, and pork (T3)", and "I feel better eating less red meat (T2)".
 - Orange edges:** Connect "I am trying to cut down on red meat (T2)" to "I eat chicken, beef, and pork (T3)", "I have health concerns about red meat (T2)" to "I eat chicken, beef, and pork (T3)", "I eat chicken, beef, and pork (T3)" to "I feel better eating less red meat (T2)", and "I am concerned about environmental impacts (T13)" to "I eat chicken, beef, and pork (T3)".

A graph with four nodes: T-1 (blue), T2 (orange), T3 (orange), and T13 (green). The edges are as follows:

- T-1 to T2: Purple
- T-1 to T3: Purple
- T-1 to T13: Purple
- T2 to T3: Orange
- T2 to T13: Orange

Figure 1: A network diagram showing relationships between 10 variables. The variables are represented as nodes, and the relationships are represented as edges. The nodes are colored blue, green, or red, and the edges are colored orange, green, or purple. The variables and their connections are:

- I want to try more plant-based recipes (T-1)** (blue node) is connected to **I eat meat five to six days weekly (T15)** (red node) and **I experience environmental concerns (T13)** (green node) by orange edges.
- I eat meat five to six days weekly (T15)** (red node) is connected to **I feel better eating less meat (T20)** (red node) and **I experience health concerns (T16)** (green node) by orange edges.
- I feel better eating less meat (T20)** (red node) is connected to **I experience health concerns (T16)** (green node) by a purple edge.
- I experience environmental concerns (T13)** (green node) is connected to **I lack storage for fresh vegetables (T-1)** (blue node) by a green edge.
- I lack storage for fresh vegetables (T-1)** (blue node) is connected to **I have a large freezer (T-1)** (blue node) and **I have limited refrigerator space (T-1)** (blue node) by orange edges.
- I have a large freezer (T-1)** (blue node) is connected to **I purchase meat because it is easy to freeze (T0)** (blue node) by a purple edge.
- I have limited refrigerator space (T-1)** (blue node) is connected to **I purchase meat because it is easy to freeze (T0)** (blue node) by a purple edge.
- I purchase meat because it is easy to freeze (T0)** (blue node) is connected to **I experience health concerns (T16)** (green node) by a green edge.
- Friends and family do not influence my eating (T-1)** (blue node) is connected to **I want to try more plant-based recipes (T-1)** (blue node) by a purple edge.
