

The diagram illustrates the relationships between five nodes representing different concerns and habits related to meat consumption. The nodes are connected by lines of two colors: orange and purple.

- Nodes:**
 - I eat meat regularly (T18)** (Pink node at the bottom)
 - I vary between white and red meat (T2)** (Orange node in the middle)
 - I am concerned about health effects (T6)** (Green node at the top left)
 - I am concerned about environmental impact (T13)** (Green node at the top right)
 - Family influences my meat-eating habits (T1)** (Orange node on the right)
- Connections:**
 - Orange lines:** Connect T18 to T2, T6, and T13.
 - Purple lines:** Connect T6 to T13, T13 to T1, and T1 to T2.

A graph with five nodes: T1 (orange), T2 (orange), T6 (green), T13 (green), and T18 (pink). The edges are: T6-T13 (purple), T6-T18 (orange), T18-T2 (green), and T18-T13 (orange). Self-loops are present on T6, T13, and T2.

Figure 1 is a network diagram illustrating relationships between variables. The nodes are represented by colored circles with text labels. The connections are as follows:

- Orange lines:**
 - From "Social contacts regulate red meat intake (T16)" (red circle) to "I regulate red meat consumption (T2)" (orange circle).
 - From "Social contacts regulate red meat intake (T16)" (red circle) to "I am concerned about heart diseases (T6)" (green circle).
- Purple lines:**
 - From "Social contacts regulate red meat intake (T16)" (red circle) to "Social contacts are concerned about heart disease (T16)" (red circle).
 - From "I am concerned about heart diseases (T6)" (green circle) to "I am mindful of the environment (T13)" (green circle).
 - From "I am concerned about heart diseases (T6)" (green circle) to "I avoid processed meats (T0)" (blue circle).
 - From "I avoid fatty meat portions (T-1)" (blue circle) to "I avoid processed meats (T0)" (blue circle).

A graph with nodes T-1, T0, T2, T6, T13, and T16. T-1 is blue, T0 is light blue, T2 is orange, T6 is green, T13 is light green, and T16 is red. Edges connect T-1 to T0, T2 to T16, and T6 to T16. Self-loops are present on T13 and T16.
