

A graph diagram illustrating a network structure. The central node is labeled $T-1$ and is colored blue. It is connected to four other nodes: $T20$ (red), $T10$ (orange), $T11$ (orange), and $T19$ (green). The edges are colored: green for $T-1$ to $T20$, orange for $T-1$ to $T10$ and $T-1$ to $T11$, and purple for $T-1$ to $T19$.

The diagram illustrates a network of eating habits and beliefs. The nodes and their connections are as follows:

- I avoid eating chicken (T21)** (Red circle) is connected to **I eat more plant-based options (T-1)** (Blue circle) by a purple line.
- I eat more plant-based options (T-1)** (Blue circle) is connected to **I desire to be eating healthier (T8)** (Light blue circle) by a purple line.
- I desire to be eating healthier (T8)** (Light blue circle) is connected to **I want a good source of protein (T10)** (Orange circle) by an orange line.
- I want a good source of protein (T10)** (Orange circle) is connected to **I believe lean meats are healthier (T-1)** (Blue circle) by a purple line.
- I believe lean meats are healthier (T-1)** (Blue circle) is connected to **I sometimes eat lamb or lean steak (T22)** (Purple circle) by an orange line.
- I sometimes eat lamb or lean steak (T22)** (Purple circle) is connected to **I feel better eating plant-based diets (T-1)** (Blue circle) by an orange line.
- Social contacts do not influence my eating (T16)** (Green circle) is not connected to any other nodes.

The graph visualization displays a network of nodes and edges. The nodes are labeled T10, T8, T-1, T22, T21, and T16. The edges are represented by thick lines. A path is highlighted in green, connecting T10 to T8 to T-1. A shorter path is highlighted in orange, connecting T-1 to T22. Nodes T21 and T16 are shown in isolation, with no edges connected to them.
