

My family does not eat much red meat (T2)

I do not like beans (T-1)

I find lean meats easiest for protein (T14)

I prefer to eat chicken (T21)

I enjoy eating meat (T-1)

I am comfortable with my meat routine (T17)

```

graph LR
    T21((T21)) --- T2((T2))
    T21 --- T-1((T-1))
    T21 --- T17((T17))
    T-1 --- T14((T14))
    T14 --- T17
  
```

The diagram shows a network of seven nodes and their relationships. The nodes are:

- My parents avoid red meat (T2) (Blue)
- I eat meat at least once a day (T15) (Orange)
- Meat is a good source of protein (T14) (Orange)
- I enjoy eating meat (T-1) (Blue)
- My friends eat more red meat (T2) (Blue)
- I eat less pork than before (T-1) (Blue)
- I enjoy breakfast less than before (T-1) (Blue)

The relationships (edges) are:

- My parents avoid red meat (T2) to I eat meat at least once a day (T15) (Orange)
- My parents avoid red meat (T2) to I enjoy eating meat (T-1) (Orange)
- My parents avoid red meat (T2) to I eat less pork than before (T-1) (Orange)
- I eat meat at least once a day (T15) to Meat is a good source of protein (T14) (Purple)
- I eat meat at least once a day (T15) to I enjoy eating meat (T-1) (Purple)
- I eat meat at least once a day (T15) to My friends eat more red meat (T2) (Purple)
- Meat is a good source of protein (T14) to I eat less pork than before (T-1) (Purple)
- I enjoy eating meat (T-1) to I eat less pork than before (T-1) (Purple)
- I enjoy eating meat (T-1) to I enjoy breakfast less than before (T-1) (Purple)
- My friends eat more red meat (T2) to I eat less pork than before (T-1) (Purple)
- I eat less pork than before (T-1) to I enjoy breakfast less than before (T-1) (Purple)

A graph with four nodes: T2 (light blue), T-1 (dark blue), T15 (orange), and T14 (orange). Edges connect T2 to T-1, T2 to T15, T-1 to T15, T-1 to T14, and T15 to T14. The edges (T2, T15) and (T-1, T15) are highlighted in green.
